THE PASSION PLAY

(COPYRIGHTED)

Scenes and Incidents in the Life of Our Lord, JESUS CHRIST, from His Birth to the Ascension.

COMPLETE IN 31 LIFE MOTION PICTURES.

Impressive
Educative
Soul-Inspiring
True to Nature
Pronounced to be Wonderful
A Mighty Attraction
For Church and Theatre

Stirring
Powerful
Pathetic
Elevating
—
Absolutely the
finest
Subject ever
Presented
—
Lubin's Master-
piece

WE would call your particular attention to the fact that we have the only complete set of Passion Play Films. There is no other Passion Play in existence to-day showing the birth, life, sufferings and death of Jesus, in Life-Motion Pictures so complete in detail. Each Film is a masterpiece.

By exhibiting these Films you will be in a position to make a small fortune, there being but a few on the road at the present time, any one of whom realizes as much as \$100 per night.

OUR TERMS

We sell for cash only and carry no book accounts. Goods are not sold on time.

We forward goods C. O. D. only upon receipt of one-half the amount of the original order. Customers can save return charges on C. O. D. shipments by sending full remittance with their orders.

If desired, we ship goods with the privilege of examination in the Express Office. It is required that the customer send one-half deposit with order to show the order is given in good faith.

Goods to be sent by mail will be forwarded only when accompanied by cash in full.

If immediate shipment is required, do not send personal checks, but money order or draft only.

Be careful to give full address and to state line or Express Company by which shipment should be made.

If further information is desired we will be pleased to write in greater detail upon request. Any information relating to the Cineograph or Films will be cheerfully furnished. We are in the business to keep you well informed and supplied with the best goods; therefore, do not hesitate in making your wants known to us.

We manufacture not only the world-renowned Cineograph with Stereopticon Combined but also Films, Stereopticon Slides, in short everything pertaining to the Life Motion Picture Business.

OXODIUM, OXYLITHE or OXONE

FOR USE WITH OUR

OXYLITHE GAS-MAKING OUTFIT

OXODIUM
NEW COMPOUND...
FOR THE PRODUCTION
OF OXYGEN GAS

BE LATEST product in this line, and possessed of many merits that are appreciated by the trade. It is compact and will not crumble. It gives a uniform supply of Oxygen gas.

The gas is 98 to 100 per cent, guaranteed by the manufacturer to produce 158 cubic feet per box, which is equal to that of any other gas.

Oxodium is adopted for use in the Oxydium Gas Outfit, and all users of this outfit prefer it to all others.

OXODIUM
THE ADVANTAGE of being able to produce oxygen gas in such a compact and portable outfit is a decided one. Compressed air contains about 0.5 per cent. of impurities which are easily removed and reduce the intensity of the illumination, hence a great advantage to be gained by the Enterprise Outfit, to say nothing of its convenience.

If you have a gas making outfit, send a trial order if you haven't the gas outfit, order both.

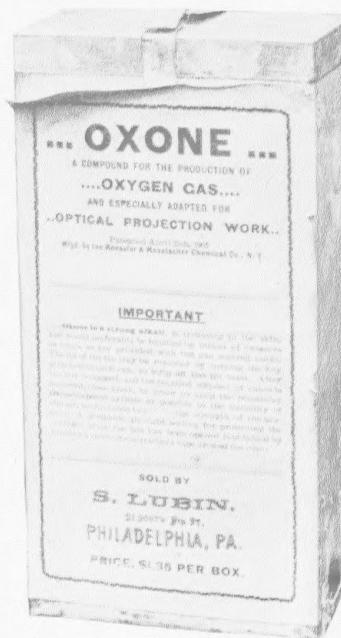

Want for the production of Oxygen Gas, packed \$1.35 per box.

S. LUBIN
LARGEST MANUFACTURER OF
Motion Picture Machines and
2 South Eighth Street
PHILADELPHIA, PA.

One box contains enough chemicals for a two hours performance.

Price, \$1.35 per box

29

IMPORTANT

Please be advised when ordering Oxodium or Oxone, to have the box provided with the proper amount of the compound required for the particular outfit. The outfit of the user will determine the amount of the compound required, as the amount of the gas produced will depend on the amount of the compound used. After the gas is produced, the user will be able to determine the amount of the compound required, but, however, we suggest the following: For the Oxydium Gas Outfit, one box of Oxodium or Oxone will be sufficient for the production of 158 cubic feet of oxygen gas. For the production of 158 cubic feet of oxygen gas, one box of Oxodium or Oxone will be sufficient for the production of 158 cubic feet of oxygen gas.

SOLD BY
S. LUBIN.
21 South 8th St.
PHILADELPHIA, PA.
PRICE, \$1.35 PER BOX.

The illustrations below show how to prepare and join films when it is desired to run them on reels, or to join them when the ends become separated.

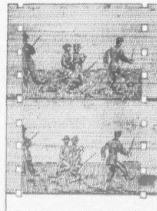

Fig. 1.

BLANK FILMS
For connecting two or more pictures and as starters.
5 CENTS PER FOOT

Fig. 2.

Fig. 3.

Figs. 1, 2, 3 show how to prepare films when necessary to repair, or to join 2 or more films.

Film Repairer, Made of Solid Brass, Nickled.
Price, \$1.00.

DIRECTIONS.

Cut the Film about $\frac{1}{4}$ inch from LOWER line of one of the pictures, see Fig. 1. Cut the other end of Film to the extreme TOP line of the picture. The $\frac{1}{4}$ inch on the end is necessary to make the lap. Moisten with the tongue the end on which the $\frac{1}{4}$ inch has been left, and scrape off the Emulsion to the line of the adjoining picture, with a pocket knife, see Fig. 1. The white space on Fig. 1, which should be about $\frac{1}{4}$ inch long and is part of another picture, shows where the Emulsion has been scraped off. This is where the Cement should be placed. Be sure to spread the Cement in equal proportion on the Film. (The dull side of the Film is the Emulsion side.) Lay Fig. 1 on half of the Film Mender, Fig. 3, and apply the Cement. Then lay Fig. 2 on the opposite side of the Mender, and press the finger tightly through the centre directly over the joint, for a moment, and the Cement will dry in a few seconds. If properly cemented, the joint will be equally as strong as before the Film was cut.

Film Cement.
Price, 15c per Bottle.
By Mail, 25c.
